ERRATUM

Tolerance of the Small Bowel to Therapeutic Irradiation:
A Focus on Late Toxicity in Patients Receiving Para-Aortic Nodal Irradiation for
Gynecologic Malignancies: Erratum

In the article that appeared on page 593 of the May 2013 (Volume 23, Issue 4) issue of International Journal of Gynecological Cancer, an error has been noted in the following sentence: “Bulky PALNs were irradiated using Intensity Modulated Radiation Therapy (IMRT) TomoTherapy HI-ART (Precision Radiotherapy, West Chester, OH) to a dose of 50.4 Gy (1.8 Gy per fraction) to the para-aortic area followed by a boost to the gross PALNs to a total final dose of 61.4 Gy.”

The correct manufacturer of the TomoTherapy HI-ART is Accuray, Sunnyvale, CA. The sentence should be corrected to read:

“Bulky PALNs were irradiated using Intensity Modulated Radiation Therapy (IMRT) TomoTherapy HI-ART (Accuray, Sunnyvale, CA) to a dose of 50.4 Gy (1.8 Gy per fraction) to the para-aortic area followed by a boost to the gross PALNs to a total final dose of 61.4 Gy.”
